

Keeping it hot or cold

AmerThermo™ is designed for carrying frozen products, beverages, grilled food, and other cold and hot products home from the store. This innovative thermo bag also protects flowers, herbs, salads, and other delicate items even in the depths of winter. Due to its versatility and attractive looks, it is also a great promotional gift during seasonal campaigns.

- Cold and hot products
- Flowers, salads, herbs, and other products sensitive to cold

Creating Convenience

Maintaining the optimum temperature of purchases

Reclosable thermo bag

AmerThermo™ is ideally suited for transporting frozen food, ice cream, frosty or steaming beverages, and grilled products. On top of this, our thermo bag preserves the delicious aromas of grilled food, guaranteeing an enjoyable dining experience at home. Furthermore, flowers, salads, herbs, and other products sensitive to cold make it home from the store in prime condition even in sub-zero temperatures.

Easy to fold, fast to pack

The strong zipper closure makes AmerThermo™ easy to open and close repeatedly. Thanks to its soft closure structure, it is also easy to fold up, store, and take along on the next shopping trip.

Additionally, our AmerThermo™ flower bag is extremely fast to pack, which reduces queuing and makes flower packing much more pleasurable for both the customers and store personnel.

Completely recyclable

All AmerThermo™ products are manufactured in Finland – using polyethylene film that is suitable for food contact. Furthermore, the closure and plastic foam inside the bag are also made of polyethylene. This makes the bag completely recyclable.

Excellent promotional tool

AmerThermo™ offers long-lasting and cost-efficient media space for your store or brand. Our thermo bags are also perfectly suited for spicing up special seasonal campaigns – such as ice cream and cold beverage sales in the summer. Thanks to our high-quality printing in up to eight beautiful colours, you are guaranteed to captivate your target audience.
