

Ideal packaging for your hygiene products

You can always count on Suominen Flexibles to provide your sanitary towels, incontinence products, or other feminine care products the packaging they deserve. Our bags, wrap films, and laminated films are guaranteed to attract attention and provide your products the optimum protection they need.

- Sanitary towels
- Pantyliners
- Tampons
- Incontinence products
- Cotton products

Beautiful packaging attracts customers to your products

Customisable according to your needs

Our multilayer films and bags provide excellent customisation potential. High-quality raw materials give you optimal stiffness, strength, and sealing properties. They also enable you to run our products very efficiently on the latest packaging lines. Since our products need less raw material, they are also more efficient from a resource usage standpoint.

Perforation can be used to provide various easy-to-open solutions. Complement this with a handy sticker and you have a package that is also easy to close.

Stylish looks that catch the eye

Utilise our high-quality reprographic and flexographic printing expertise and make your products stand out from the competition. Select the packaging material in either transparent or white. A number of special printing effects together with up to 10 vibrant colours make even the most challenging art work possible. Furthermore, you can highlight special campaigns using our innovative AmerPromo™ coding system and promotional stickers.

Our laminated bags with their optimised opacity and gloss open up new, visually striking possibilities. You can, for example, use holograms to increase the appeal of your products.
