

## For ideal convenience

When packing groceries, sweets or even electronics and spare parts, easy reclosability and reusability are often essential. Suominen Flexibles provides ideal solutions for your packaging needs. Select well-known and easy-to-use Minigrip®, a truly timeless classic. Or go with our zipper bags if you need even stronger resealability or more versatile printing options.

- Groceries
- Dry products and powder
- Sweets
- Pet food
- Hygiene products
- Electronics supplies
- Pharmacy supplies
- HVAC supplies
- Spare parts

## Easy to open and close

### Zipper it

If you require a stronger, resealable closure and a greater range of printing options, we recommend our zipper packaging. All our zipper bags are made of plastic suitable for food packaging.

In addition, they can be customised for your unique needs with perforation and micro-perforation, bottom gussets, as well as various carrying handles and hanging holes. As the closure is attached to the film after printing, we can print our zipper products in up to eight colours.

### Convenient and versatile Minigrip

Our Minigrip® bags have become a classic. The secret to Minigrip®'s success lies in its easy-to-use grip, which is designed to withstand repeated opening and closing. Their versatility and durability have guaranteed their popularity everywhere – from people's freezers to packing carry-on cosmetics for people on the go.

Our Minigrip® bags come in a wide variety of standard sizes – with a white background for writing on or without it. They can be printed in up to five colours and equipped with hanging holes to facilitate storage.
