Our sustainability agenda 2020–2025

- Zero LTA (lost time accidents)
- Engagement index 73% by 2025

People and safety

We invest in increasing employee engagement.
We continue to build a high performance culture.
We continue to strengthen our safety culture.

Sustainable nonwovens

We are the frontrunner in sustainable nonwovens.

- Over 10 sustainable product launches per year
- Sustainable products: 50% increase of sales by 2025 (base year 2019)

Reduction targets are set per ton of product

- 20% reduction of energy consumption
- 20% reduction of process waste to landfill
- 20% reduction of water intake
- 20% reduction of emitted greenhouse gas emissions (base year 2019)

Low impact manufacturing

We continuously strive to decrease environmental impacts of our operations

Corporate citizenship

We promote responsible business practices in our operations and supply chain.
We communicate openly and transparently about our operations.

- Renewed Code of Conduct coverage: 100% of existing employees and new hires
- Raw material suppliers audited against supplier code (based on risk assessment)

Financial targets 2020–2025

How to get there?

Growth

- Focus on fast-growing sustainable products
- Innovation and launching new products to capture market share
- Targeted investments to improve capabilities and increase capacity

Profitability

- Effective utilization of production lines
- Margin improvement through new products as well as production and raw material efficiency
- Continued fixed cost control

Gearing

- Balanced investment plan
- Healthy cash flow from operations

INVESTMENT HIGHLIGHTS

Investment highlights

Nonwovens markets are growing in all regions

Legislation and consumer behavior are driving the need for more sustainable products and we are very well placed to respond to this growing demand

Our organization and strategy give us an excellent basis to continue to develop the company further

Strong profitability, balance sheet and cash flow

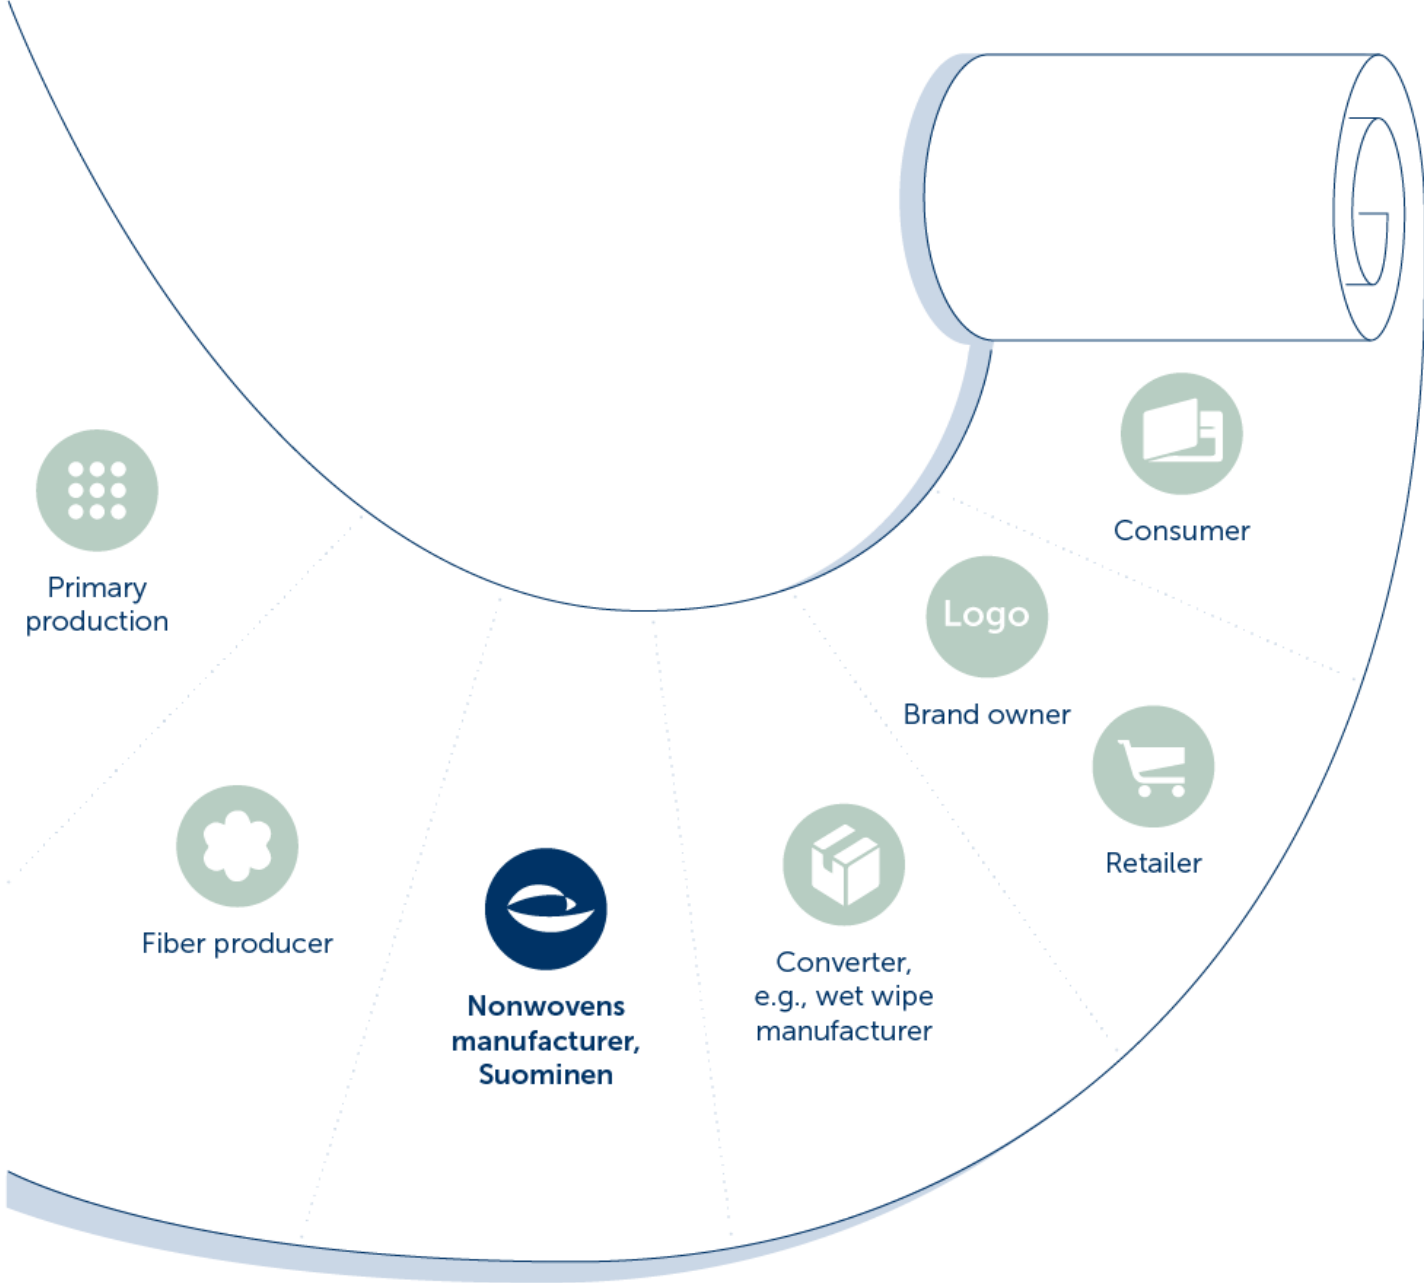

Nonwovens markets are growing in all regions

We are the leaders both in the spunlace and wipes nonwovens markets

The COVID-19 pandemic increased sales volumes in all our markets. The demand for wipes is expected to remain above pre-COVID-19 levels

Legislation and consumer behavior are driving for more sustainable products and we have excellent opportunities to meet this growing demand

Suominen's position in the nonwovens value chain

Mission

Enabling our customers to win by creating quality nonwovens

Vision

Frontrunner for nonwovens innovation and sustainability

Strategy: Growth and profitability through sustainability, customer focus and efficiency

We will grow by creating innovative and more sustainable nonwovens for our customers and improve our profitability through more efficient operations and a high performance culture. Our main focus is on wipes.

We will strengthen our capabilities in Europe and Americas, and evaluate opportunities in Asia.

Strategic focus areas

Operational excellence

Sustainability leadership

Differentiate with innovation and commercial excellence

Great place to work

Dual operating model

Values

Ownership

Teamwork

Performance

Integrity

Progress in strategy implementation in 2021

Three investment projects completed, two in Italy and one in the USA

Share of new products above 25% of net sales

Sales of sustainable products increased 47%*

16 sustainable product launches

- 20.3% reduction in water consumption**
- 16.4% reduction in waste to landfill**
- 8.8% reduction in greenhouse gas emissions**

Demand for sustainable alternatives is growing

Legislation and consumer behavior are driving for more sustainable products

77% of consumers say that sustainability is important to them

72% of consumers are willing to pay a premium for brands that support recycling, practice sustainability, and/or are environmentally responsible

57% of consumers say they are willing to change buying habits to reduce environmental impact

April 2022

Pioneer in sustainable products

BIOLACE® sustainable product portfolio since 2007

We invented the wetlaid spunlace category for flushable dispersible nonwovens – HYDRASPUN® product family

Strong R&D

15 R&D professionals

Focus on sustainability and customization

Excellent know-how in sustainable fibers

New Fiber Center

Pilot lines to support R&D and fast go-to-markets

Technology fit to sustainable nonwovens

8 plants – all capable of using sustainable raw materials

6 of them with pulp capability

We are able to tailor-make our products according to customers' different definitions of sustainability

FINANCIALS Q4 AND FULL YEAR 2021

Net sales

Net sales, EUR million

Net sales, EUR million

- In 2021 sales volumes decreased while sales prices increased following higher raw material prices. Currencies impacted net sales negatively by EUR 11.1 million
- In Q4 volumes recovered from Q3, and net sales increased by 4% from Q4/20 to EUR 115.6 million (111.1)
- Share of new products continued to be above 25% of net sales

EBITDA

EBITDA, EUR million

EBITDA, EUR million

2016-2018 EBITDA before application of IFRS 16 Leases

- Q4 EBITDA was EUR 9.0 million (13.5) with full year EBITDA at EUR 47.0 million (60.9). Currency impact was EUR -0.5 million in the quarter and EUR -2.4 million for the full year
- Quarterly and full year EBITDA decreased mainly due to lower sales volumes. The increases in raw material, freight and energy costs were not fully compensated by sales prices. Manufacturing and SG&A cost savings actions as well as other operating income and expenses impacted the result positively

Cash flow from operations

Cash flow from operations, EUR million

Cash flow from operations, EUR million

- Cash flow from operations for the full year was EUR 11.1 million (57.0)
- Q4 cash flow from operations improved from Q3 due to the better result. Net working capital increased somewhat but the impact was lower than in Q3

Outlook 2022

Suominen expects that its comparable EBITDA (earnings before interest, taxes, depreciation and amortization) in 2022 will decrease from 2021. The main reasons are inventory levels which still remain high at certain customers as well as operational issues in the entire supply chain due to the current COVID-19 situation, both of which will impact the result negatively especially in the first quarter.

In 2021, Suominen's comparable EBITDA was EUR 47.0 million.

SUMMARY

Summary

- Suominen manufactures nonwovens as roll goods for wipes and other applications
- Eight locations on three continents
- Net sales EUR 443.2 million in 2021
- Over 700 professionals
- Our vision is to be the frontrunner for nonwovens innovation and sustainability

Our organization

Sustainable Development Goals - Suominen

The Sustainable Development Goals (SDG) adopted by the United Nations in 2015 define international sustainable development focus areas and goals. We have identified three SDG's which cover the areas where we can make the biggest contribution and our sustainability agenda guides our work towards these goals.

We promote responsible business practices throughout the value chain and we do not tolerate any kind of slavery, forced or child labor or human trafficking in our own or our suppliers' operations

We promote equal opportunities for all. Our principle is "equal pay for equal contribution". A safe workplace is one of our top priority and we are continuously striving to improve our safety culture to achieve an accident free workplace.

Our goal is to use natural resources as efficiently as possible and strive for minimization of waste in our production and finding alternative outlets for non-recyclable waste.

With our product offering we contribute to this goal by taking into account the whole value chain in our product design in order to decrease any negative impacts on the environment. We report our activities and progress towards our sustainability goals publicly.

We are committed to reduce greenhouse gases from our operations by improving our energy efficiency and finding alternative low-carbon energy sources.

With our product offering we are contributing to this goal by calculating carbon footprint of our products including the whole value chain and developing solutions with smaller impact on climate.
